

APPROACH TO SECURITY IN SMEs – OPPORTUNITIES AND INNOVATIONS

9 September 2016 – Loc. Piscinamanna –Ed. 2 (Pula)

The tasks of creating, transmitting, processing and storing any kind of information are more and more demanded to computers. People communicate with each other through email, instant messages, social networks platforms. Each individual is immersed in a continuous information flow. The seminar (held within Scientific School “Building Trust in the Information Age”), is intended as open seminar to SMEs and people interested in taking part. Registration is mandatory.

PROGRAMME

09:00 – 12:30 Morning Session: **Miguel P. Correia**, Web application security: from static analysis to dynamic protections and recovery

13:30 – 15:00 First Afternoon Session: **Matteo Meucci**, The OWASP (Open Web Application Security Project) testing guide v4

15:30 – 17:00 Second Afternoon Session: **Marco Morana**, Threat Modeling with Pasta

.....

Miguel P. Correia is an Associate Professor at Instituto Superior Técnico (IST) of the Universidade de Lisboa (ULisboa), in Lisboa, Portugal. He is a researcher at INESC-ID in the Distributed Systems Group (GSD). He has been involved in several international and national research projects related to intrusion tolerance and security, including the SafeCloud, PCAS, TLOUDS, ReSIST, CRUTIAL, and MAFTIA European projects.

Matteo Meucci is co-founder and CEO at Minded Security the Software Security Company from 2007. He has more than 13 years of specializing in Application Security and collaborates from 2002 with OWASP (Open Web Application Security Project); he founded the OWASP-Italy Chapter in 2005 and leads the OWASP Testing Guide from 2006.

Marco Morana is Head of cyber-security strategy goals, activity planning globally for Citi ICG (USA). Risk manager focused in analysis of threats and promotion of new technical and process measures to reduce risks to the corporate bank clients. Author of various technical standards and processes in the application security space. Keynote speaker on various topics of cyber-threats against the financial sector. Author of several articles and two (2) books on various cyber-security topics. Involved with start-ups as outside director and as advisor. Mentor of start-ups acceleration programs.
